Professional experience

- Senior software consultant** Neo
03/2025 - 04/2026
As a Senior Software Developer, I led and contributed to the development of various projects, conducting thorough code reviews....
Riyadh ksa
- Fulstack developer Madar I Cloud Venture Builder**
09/2024 - present
Worked as a Fullstack developer maintaining multiple tenant e-learning marketplace project
Riyadh ksa
- Fulstack developer** Softylines
10/2022 - present
As a fullstack developer, I assisted in the development of various projects, contributing to their design, implementation, and optimization.
Sousse
- End of study internship** QUERMES sousse
02/2022 05/2022
sousse
Development and integration of an alert system in MES (manufacturing execution system) with ReactJs, NodeJs and mongodb
- Web development intern**
Gpro consulting
08/2020 10/2020
Sousse sahloul
Develop an e-commerce website using nodeJs, Angular and mongodb

Interests

- Sport**
- Video games**

Projects

Analytics Web application Technologies Reactjs, typescript, sass, RTK

query, redux toolkit, socket

Realtime analytics platform for e-learning project.

Responsive design.

Real time data updates.

Data caching and polling.

Smart chatbot assistant

Technologies Reactjs, typescript, sass, Python, FastApi, web socket

Fintune LLM Llama2 for english and french exams generation

Implement fastApi server

Implement chatbot user interface

Cosmetic E-commerce

Technologies Reactjs, typescript, sass

Implement admin dashboard

Product and categories CRUD

E-commerce dashboard

Responsive design

BookAuthor System

Technologies Reactjs, typescript, sass, Redux toolkit

web application designed to assist authors in creating books by providing tools and features tailored to streamline the writing process.

Implement admin dashboard.

Book chapter tree with drag and drop.

-implemented RBAC (Role Based Access Control) feature.

Ostedhy E-learning platform

Technologies ReactJs, javascript, html, sass

Implemented Admin dashboard, teacher space and student space.

Student video progress in real time

Project Link : <https://ostedhy.com/>

TAM (Task application management)

Technologies Reactjs, typescript, sass, Redux toolkit

-implemented auth, user verification, workspace creation

Virtualized List view with drag and drop feature

Real time tasks updates

Project Link : <https://app.tamdone.com/>

KOLCT (NFT cards marketplace)

Lead the frontend Team.

Reviewing pull requests.

Optimizing frontend performance (caching, infinite scroll, virtualisation etc...)

jadeer (E-learning marketplace)

Technologies Nextjs, React, typescript, sass, Redux toolkit, PHP, Mysql, Symfony, AWS s3 bucket, AWS Route 53

Develop and maintain super admin, student, business admin and consultant views.
